

ARC Education Project Colloquium

ANNELI RAUTIAINEN,
HEAD OF THE INNOVATION CENTRE AT
THE FINNISH NATIONAL AGENCY FOR
EDUCATION

November 14, 2019

10:00-11:00

LMX 390

How do we co-create a ten times more intelligent education system? How do we move from learning ego-system to eco-system, and what are the drivers for change?

In this presentation, Anneli Rautiainen will share insight into the current Finnish education system and its challenges related to both well-being and learning in the context of the new Curriculum. She will also talk about the work of the Innovation Centre, where she and her team focus on facilitating system change by moving from traditional ways of working to experimentation and iterative development work at the government, education providers and school levels. This also requires a new kind of leadership and working culture in the autonomous Finnish education system.
